

DAY 2 HTML CSS Exercises

1. Create an image gallery using HTML and CSS that displays multiple images in a grid format. Use CSS to add hover effects, such as zoom or grayscale, to the images.
2. Create a testimonials slider using HTML and CSS that displays multiple testimonials in a slider format. Use CSS to style the slider and add transition effects.
3. Build an HTML page displaying a calendar for the current month. Use CSS to style the calendar with different colors for weekdays and weekends.
4. Create a modal dialog using HTML and CSS. It should be centred on the screen with 5 Form Inputs and have a close button.
5. HTML CSS challenge : **four-card-feature-section**
