

Day 3 HTML CSS

1. Build a single-page portfolio website using only HTML and CSS. Include sections like "About Me," "Skills," "Projects," and "Contact," featuring animations and smooth transitions between sections when scrolling.
2. Create a simple webpage that displays a list of your favorite books. Use HTML to structure the page and add some basic styling using CSS. You could include an image, title, author, and description for each book.
3. HTML CSS exercise : product-preview-card-component-main
4. HTML CSS exercise : four-card-feature-section
