

Day 6 HTML/CSS tasks:

1. Create a responsive navigation bar using only HTML and CSS that collapses into a hamburger menu on smaller screens.
2. Build a grid layout using CSS Grid that adjusts the number of columns and rows based on the screen size.
3. Create a hover effect on images using CSS that reveals a caption with a description of the image.
4. Build a form with validation using only HTML and CSS that provides error messages when the form is submitted with invalid input.
5. Create a multi-page website using HTML and CSS that includes a fixed header and footer, and uses CSS media queries to change the layout for different screen sizes.
